

Cool scandinavian loudspeakers

The alternative to the ordinary

SA is the only loudspeaker brand founded by a musician. Ole Witthøft played in a band and was surprised that none of the speakers in the market were capable of reproducing music in a natural way.

When he built his first speakers in 1984, the press proclaimed that:

"This speaker sets new standards".

Since then, our speakers have spread to most of the world and have come out top in countless tests and won numerous awards.

People who choose to live with our speakers stand out from the crowd because they demand sound experiences above the ordinary standard.

Durable concepts

Today, Ole Witthøft is development manager for SA and heads one of the best acoustic teams in the world.

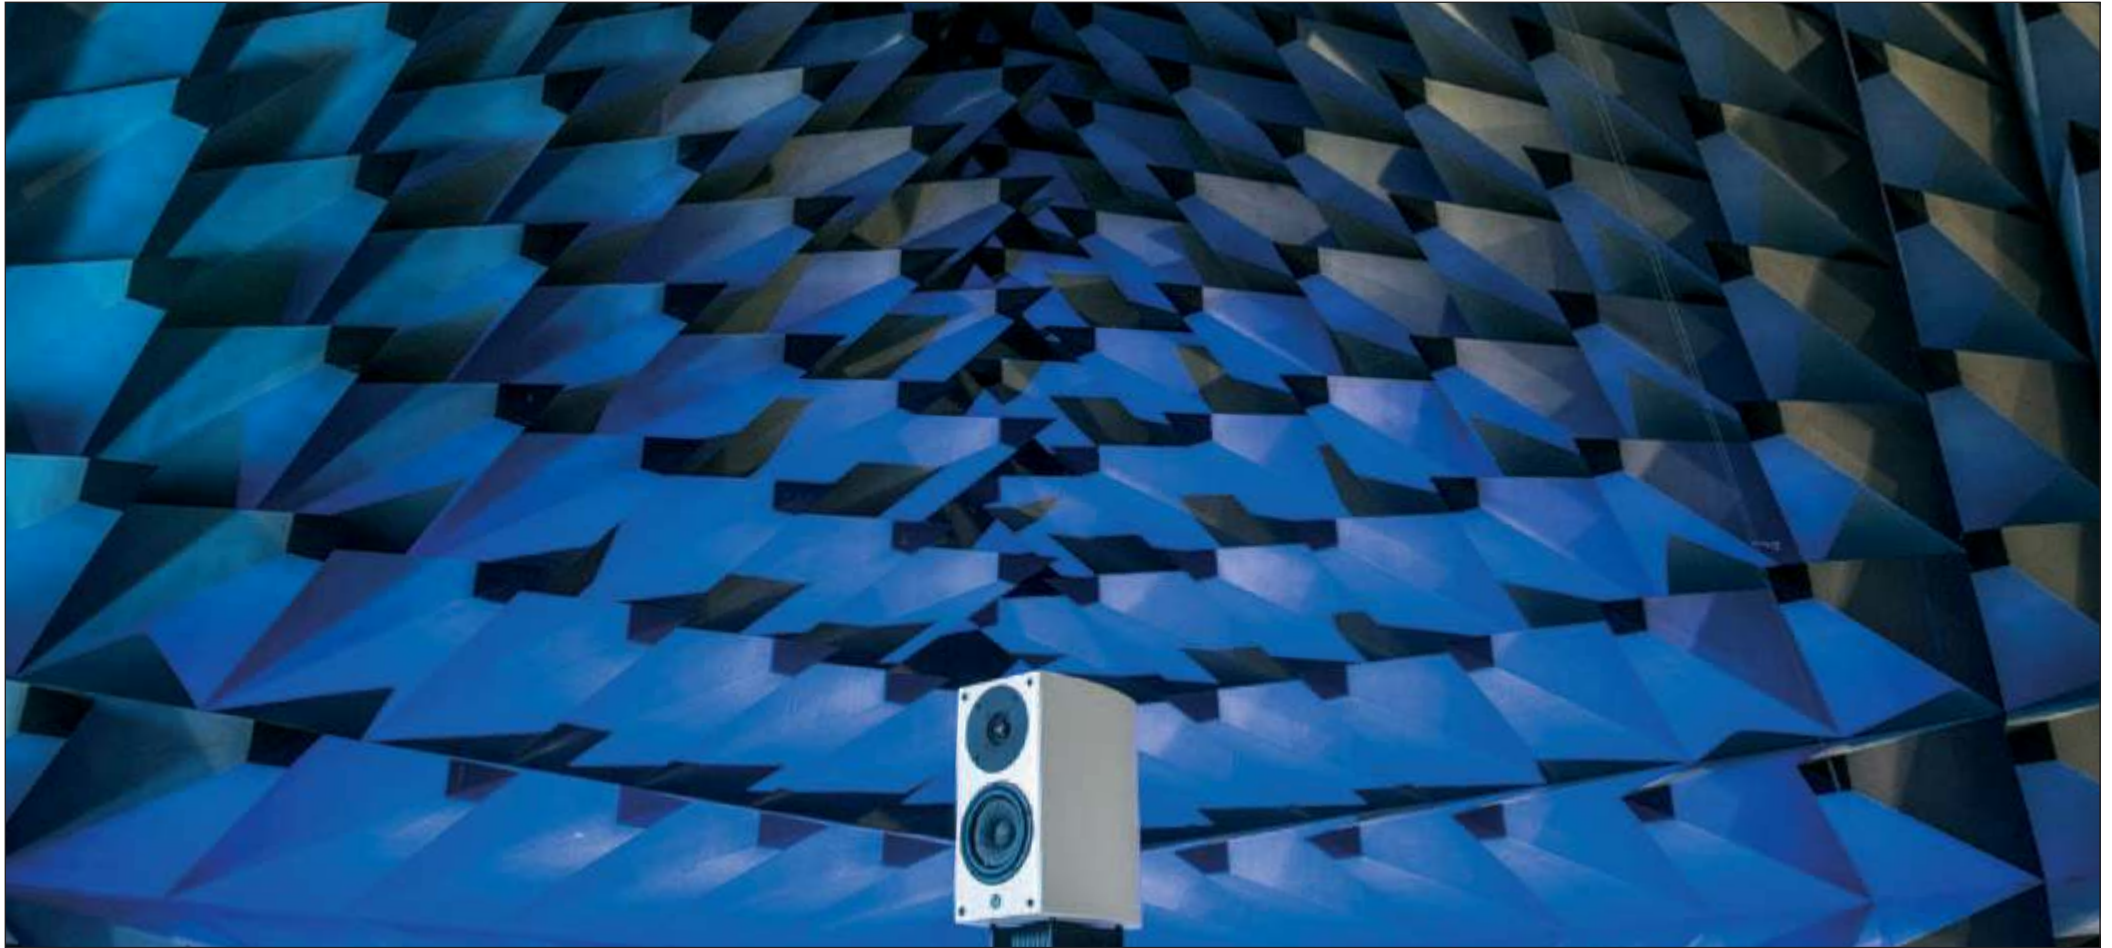

Our work is driven by a love for sound and not just technology. We constantly challenge the limits of technology seeking to invent speakers even more musical than before.

As a result, it usually takes several years to develop an SA speaker. They are, on the other hand, based on concepts that easily stand the test of time.

Form with content

Speakers sound best when they are placed in a central and visible position in your living room. For that reason, SA integrates acoustics and design, producing craftsmanship so beautiful that our speakers are also a pleasure when they are not being used.

SA speakers are designed to be a part of your home as well as to sound perfect in combination with any quality home audio system.

Follow the sound

SA was created out of love for music, and perfect sound is our everything.

Our speakers offer a sound quality you will love; the sensation of being close to the music. The feeling of presence.

You will experience it when you clearly sense each and every word spoken or sung.
When you cannot but follow the rhythm and enjoy each single instrument.
When you tap your foot in time with the music simply because you cannot help it.

During our design process, we work with audio on computers in 3D and conduct our testing in special listening facilities. All our speakers must pass numerous listening tests and we are among the very few manufacturers working interactively with user involvement, and an open innovation environment.

All our efforts aim at one purpose only:
To take you close to the greatest thing created by man - Music.

Design with an attitude

We love simplicity but offer you more.

You will discover unexpected details in our speaker designs if you care for a closer look: A small visual story like an exclamation mark, a smile or some other detail we worked into the designs.

Come closer. We love to surprise, and create loudspeakers that stand out from the crowd.

Enjoy the lavish finish and see for yourself what we mean by “attitude”.

SA pandion 30

The hand-built SA pandion 30 contains more than 30 years of experience in developing loudspeakers.

The sound brings you close to the artists you love, whether you like acoustic or electronic music. Use it with a high quality music system of 70 watts or more and enjoy the musical and potent sound experience and technologies that are built to last for many years.

SA pandion 2

SA pandion 2 is a breakthrough for compact loudspeakers. It breaks with the traditions and sets new standards for sound quality.

It is created for people with a burning interest in music, who want to hear every detail and nuance in the music and at the same time wanting a compact loudspeaker.

SA mantra series

SA mantra 70 is designed to bring you closer to the artists you love.

The essence of our sound is musicality, and the new SA mantra 70 is one of our best representatives of this special talent.

SA mantra 50 stands on the shoulders of its respected predecessors.

50 is a special number at SA. All our previous 50-models set new standards for their time. Now, we move the boundaries again.

SA mantra 10 is a small speaker that is intended for people who demand great sound.

SA mantra 10 and a music system of good quality will give you this incredible experience. SA mantra 10AV is the center speaker in the mantra family.

SA mantra 5 sounds much bigger than it is.

The full-bodied and musical sound is an invitation to many hours of enjoyment of all kinds of music.

SA aura series

SA aura 70 fulfills the dream of a speaker which is both a piece of furniture in wonderful build quality and a music provider that brings you close to the artists you love.

SA aura 50 has the ability to surprise. You see a small floor standing speaker, but you hear a big and breathtaking sound. The design is refreshingly simple and build quality is sky-high.

SA aura 10 is designed for people, who hear all kinds of music and who wants speakers that can bring the music fully into their home.

SA aura 10AV is the center speaker in the aura family.

People choose SA aura 1, when they need a small speaker in a high quality.

It gives its user a life-like experience of all kinds of music.

SA saxo series

SA saxo 50 deliver amazing sound quality for the economically concerned music lover.

A powerful and slim floor standing speaker, that easily fits in everywhere.

SA saxo 30 - only 13 cm wide

The saxo 30 model is easy to place in the room, where it works well in a music system or in a good home cinema.

SA saxo 10 - powerful and elegant

With SA saxo 10 you get big sound, stylish design and an excellent finish. It can be used in a dedicated music system, or in your home cinema. Delivered with two front grilles. One horizontal and one vertical. Prepared for WB2 wall bracket.

SA saxo 5 - great musicality

Involving sound and a dynamic and life-like presentation of all kinds of music. Prepared for W.5 wall bracket.

SA saxo 1 - small and surprisingly good

It is only 25 cm tall and 13 cm wide. Yet you will be amazed by its big sound. Prepared for WB2 wall bracket.

Wireless active speakers

SA saxo 5 active is a high quality wireless speaker.

It is easy to use and a pleasure for music lovers of all ages and all kinds of music.

SA saxo 1 active is created in love for music.

If you've never heard your favorite music from your smartphone through these speakers, we have new world for you.

Active subwoofers

You will never run dry for power with SE200. Instead you will experience a powerful and potent reproduction of deep bass.

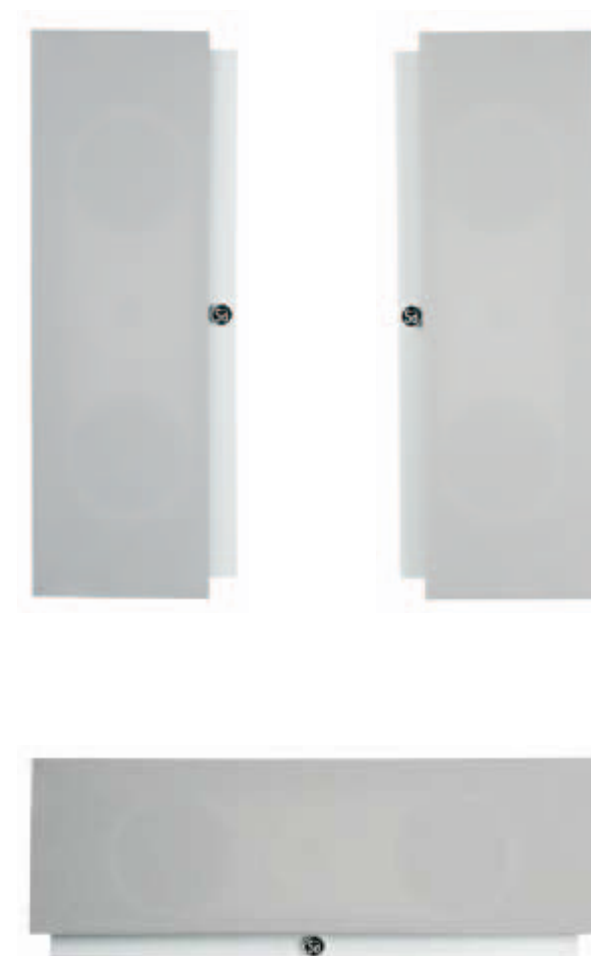

The round plate under the cabinet is not just an elegant design element. The plate can turn, changing the subwoofer from bass reflex to sealed chamber.

Use SA saxo sub 10 when you want to feel the energy and deep bass in your music or the soundtrack to your movies.

Connect this active subwoofer to any music system or home theatre system that uses any combination of loudspeaker models from the SA. You can use it both with compact loudspeakers and floor standers.

SA exact

No other speaker combines the flexibility, durability and sound quality of the SA exact.

It is unlike any other speaker because it works perfectly in places where ordinary speakers seem out of place. Get used to the idea, that SA exact represents a different way of thinking, one that combines flexibility, durability and world-class sound.

Universal speakers

SA talent. You hear them long before you see them.

Fascinated by the open, vivid and rich sound, you scan the room in search of a large pair of speakers. But there are none.
