

WiSA Announces Certification of System Audio's Legend Silverback Speakers

Legend 40 Silverback speaker wins "Best of HiFi Award" at High End 2019 in Munich

FOR IMMEDIATE RELEASE

SAN JOSE, CALIF. (May 15, 2019) – [WiSA® LLC](#), the Wireless Speaker and Audio Association founded by Summit Wireless Technologies (NASDAQ: WISA) and comprised of leading consumer electronics brands, today announces the certification of [System Audio's](#) Legend Silverback speakers.

Available now through System Audio's dealer network, this exciting new line of digital speakers includes the SA Legend 60 Silverback floor standing speaker (€8,199/pair), SA Legend 40 Silverback floor standing speaker (€5,399/pair) and SA Legend 5 Silverback bookshelf speaker (€3,000/pair).

The SA Legend Silverback present a unique family of active speakers that can be used wirelessly with a WiSA hub or WiSA transmitter or connected to a preamplifier. Each speaker has 2-4 built-in digital amplifiers of up to 560 watts, lossless digital active crossovers and a digital signal processor (DSP). The speakers can be combined to create a wireless 7.1 home theater system offering uncompressed audio in 24/96 high-definition resolution.

Recently showcased at the HIGH END 2019 trade show in Munich, the SA Legend 40 Silverback floor standing speaker earned the "Best of Hifi Award" from Germany's HiFi Eins Null Magazine.

"WiSA's technology is the most important innovation for high-end audio in decades," said Ole Witthoft, founder of System Audio. "It can be difficult for listeners to integrate premium sound experiences into their modern lifestyle and home decor, but WiSA and its interoperability standard present the necessary solution. We are proud of our new WiSA Certified Legend Silverback speakers and for playing a role in the evolution and simplification of high-performance multichannel audio."

All WiSA Certified and WiSA Ready components work together seamlessly to deliver wireless, multi-channel audio and authentic movie theater sound that immerses the listener into the middle of movies and video, music, sports, gaming/esports and more. As a result, consumers can expect an audiophile experience, but unlike traditional audio systems, set up is simple and takes just minutes even for larger 5.1 and 7.1 setups.

“It’s exciting to be adding new members and certifying audio systems at such a great pace in 2019,” said Tony Ostrom, president of WiSA. “System Audio is a staple in the industry, and the Legend Silverback speakers are stunning examples of what is possible when great brands implement powerful technology.”

The WiSA Association and its members are committed to revolutionizing the home entertainment experience by delivering immersive, uncompressed, high-definition, multichannel sound through the universal standards established and certified by the WiSA Association.
